Migration from On-premise integrations to On-cloud integrations. Separation of systems and business logic.

Technologies: API Management, File shares, Liquid Transformations, Logic Apps, Message Queues, Pipelines, ServiceBuses, Source Code Versioning, XML/Message validation

PodcastIndex.org

Content Contributor

2020-08-15 - On-going

Contributing knowledge and time, along with the "Value4Value" model (contributing Time/Talent/Treasure) where I'm running web spiders to discover, find, gather and verify Podcast feeds but also utilize Hive/Beem blockchain listeners for podpings. Worked on language tagging to reflect ISO-639 and feed URL matching patterns.

Content Contributor

Find and validate podcast feeds from various sources, PI has over 4 million podcast feeds in its directory. I'm known as "The Swedish Trickler".

Technologies: Linux Ubuntu / Debian, MySQL Server, PHP 7.x, Python 2.x/3.x, Regular Expressions, XML X-Path

Enfo Sweden AB

System Integration Consultant

2017-01-01 - 2021-11-31

Migrations and integrations in customers on-premises environments and on-cloud environments. Customization and adaption between different systems, local in customers environment and towards remote vendors through APIs.

[Name withheld] (Regional Healthcare Provider)

Healthcare provider establishing Master Data Management (MDM) platform and integrations to feed and provide data to surrounding systems and vendors.

Technologies: Bitbucket Source Code Versioning, GitLab Source Code Versioning, Java 8/11 (Component development), Python 3.x (Automation + Microservices), Redhat 7.x, Tibco EBX (Masterdata platform)

[Name withheld] (Logistics Company)

Large nordic logistics company where 8 integration platforms were coordinated from a central integration platform, migrating of platform in three steps changing datacenters and establishing new central integration platform split over disaster-safe datacenters with mirroring/warm-standby.

Technologies: AWS EC2, Ansible, Bitbucket Source Code Versioning, Jenkins, OpenResty 1.3.6.x (Nginx HTTP + Lua), Python 2.x/3.x, Redhat 6.x/7.x, SVN Source code versioning, Tibco BusinessConnect, Tibco BusinessWorks 5.x/6.x, Tibco Enterprise Message Service 8.x, Tibco MFT (Managed File Transfer)

E-man AB

System Integration Consultant

2014-04-07 - 2016-12-31

[Name withheld] (Logistics Company)

Large nordic logistics company where 8 integration platforms were coordinated from a central integration platform, migrating of platform in three steps changing datacenters and establishing new central integration platform split over disaster-safe datacenters with mirroring/warm-standby.

Technologies: AWS EC2, Ansible, Bitbucket Source Code Versioning, Jenkins, OpenResty 1.3.6.x (Nginx HTTP + Lua), Python 2.x/3.x, Redhat 6.x/7.x, SVN Source code versioning, Tibco BusinessConnect, Tibco BusinessWorks 5.x/6.x, Tibco Enterprise Message Service 8.x, Tibco MFT (Managed File Transfer)

[Name withheld] (Global Manufacturing Company)

Manufacturing company with divisions spanning many technology segments, maintaining and developing new solutions on integration platform, as central to enterprise integrations were done with all segments ERP, HR, Financial-systems.

Technologies: Active Directory, Microsoft Biztalk 2006, Microsoft Powershell, Microsoft TFS Source Code Versioning

[Name withheld] (Merchant Company)

Beverage company with stores all across the country, integrations between HR, AD, POS and Physical Passage system to do everything from on-boarding, setting up email and login for terminals to off-boarding and HR-contract logic for recurring/seasonal employments.

Technologies: Active Directory, Microsoft Biztalk 2010, Microsoft Powershell, Microsoft TFS Source Code Versioning

Quinyx WFM AB

System Developer

2013 - 2014-04-03

Development with focus on integrations against external vendors and customers systems. Import of forecast-data (sales and visitor counts) and export of salary files.

System Developer

Development and maintenance of REST and SOAP API endpoints in PHP

Technologies: Apache 2.4.x, Linux, MySQL, PHP 5.3.x, PHP-CS (Code-Smell), PHP-MD (Mess-Detection)

System Developer

Add functionality related to backend and Flash-based administrative browser client interface. Authentication/Authorization, Calendars and language support.

Technologies: ActionScript, Adobe Flash/Swift, CSS - Cascading Style Sheets, HTML, JQuery, Javascript, PHP 5.3.x, PHP-CS (Code-Smell), PHP-MD (Mess-Detection)

Improove AB

System Developer

2012 - 2012

Development of publication platforms for Dagen.se, VL.no and smaller regional newspapers websites.

System Developer

Technologies: APIs, Apache HTTP/2.4.x, Linux, MySQL, PHP 5.2.x, Varnish 2.X

Temped as production lead (3 months, while colleague was on sick leave) in daily production of betting information print products.

System Developer

Developed specialized CMS for Sports/Horse races, for publication of wall news papers, digital touch screens, fax and Text-TV.

Technologies: MySQL, PHP 4.x, PostScript, REST, SOAP

Production Coordinator

Coordinated daily production of wall news papers, gathered analyses, mounted pre-print material, produced print-ready PDFs, proofed and sent to printer for print.

Technologies: Adobe InDesign, PostScript

Eskilstuna-Kuriren AB (Webbstudion)

System Developer

2001 - 2008

Design and development of multilingual Content Management Systems with and without different features such as PDF-to-print, E-Commerce sites with payment solutions and order system

integration. Development and maintenance of multiple enterprise owned and operated newspaper websites along with 200+ external customers web sites with mail and ftp.

System Developer, Newspaper-side

Develop Newspaper web sites and support/campaign sites.

Technologies: CSS - Cascading Style Sheets, HTML/XHTML, Javascript, PHP 3.x/4.x, SMS-Gateways (MO/MT), VBScript

System Developer, Commercial-side

Customer web sites and e-commerce solutions.

Technologies: ASP Classic, CSS - Cascading Style Sheets, Fax-out solutions, HTML/XHTML, Javascript, SMS-Gateways (MO/MT), VBScript

Hosting Technician

Maintain and update, upgrade operating systems, software and machines used to host customer web sites, email, ftp solutions and DNS.

Technologies: Bind 8, Microsoft Exchange 2000, Microsoft IIS 4.x/5.x, Microsoft SQL Server 5.x, Microsoft Server 2000, MySQL Server, Oracle SQL Server

Industriell DataDesign AB

Support Technician

1998 - 2001

Technical- and Sales-support technician for Telecom-, Automation-, Avionics-, Space-, Medical-hardware. Configuration and test of components and system before delivery to customer. Design and specification of system, components and assorted custom hardware. Hands-on problem solving.

Support Technician

Helping customers with solving product related problems, included office hours support for other agents in other countries around Europe.

Technologies: Assortment of Realtime-OS, HardHat Embedded Linux, Hardware architectures, Intel 82xxx chipset-family, Intel i960 RISC, Mechanical mounting, Eurorack, Microsoft Windows 95, Microsoft Windows NT 3.5.1, Microsoft Windows NT 4 Embedded, Microsoft Windows NT 4.x, Microsoft Windows XP, Redhat Embedded Linux

Sales Support

Helping sales to evaluate solutions to meet customer needs with products, monitoring market and work with Manufacturer support. Developed CRM system to keep track of calls inbound/outbound with customers, with reminders, topics, checklists, project-involvement and hierarchical positions, list of colleagues -- to map out customers for expanding into related projects, very successful.

Technologies: ASP Classic, HTML, IIS, Microsoft Access Databases

Web Developer

Develop and maintain web site in Swedish and English languages, search engine optimization.

Technologies: ASP Classic, HTML, IIS, Microsoft Access Databases

Privately

I'm a pretty easy-going person, with a hungry mind and I like to learn new things.

Family

Married to Lynn and father to Marcus.

Interests

I challenge myself to learn new things every day, it might be outside of my regular areas of interest or it might be deep into details of something I already know about but want or need to know more about. Sometimes driven by work-related interest.

Programming, technology, photography, movies, music, culture and food. Arduino, SDR, electronics.

Projects

I usually have several projects running concurrently in my spare time, either out in the open, with repositories on github .. or privately on my servers in a closet. The below mentioned projects are public.

Swish-Katalogen

A collection of observed Swish 123-number (Companies and organizations) for the Swish payment system, as the company behind it doesn't provide any Number-to-Organization or Organization-to-Number lookups. I had an itch to scratch.

Available on github and online.

MediaCreeper

A revolt-project that was started as a protest against the FRA-lagen (Swedish Radio Establishment Law) in November 2008, where bloggers tagged their blogs with a "pixel" from the MediaCreeper service, to get reports about which media houses that were reading their blogs, this to illustrate how Big-brother would watch over everyone.

The law passed into legislation in 2009 after much debate.

I was interviewed for the Investigative Journalist Association of Sweden own magazine Scoop, for an article about journalists, reporters and media houses being exposed to surveillance on the internet. At the time a search for my name on Google yielded around 12000 hits.

I ran and managed the project between 2008 and 2022, then passing it on to somebody who would continue onwards.
